Profile Vikas Tyagi

About Me,

Hey there!

I'm Vikas, a sales professional who transitioned to a career in data analytics. With a master's in data analyst certification, I leverage data to drive business decisions. My journey started in sales, where I saw the value of data in understanding customer behavior. This led me to specialize in technical roles, using tools like Power BI for analysis and visualization. I'm excited to continue growing in data analytics and sharing my insights with you here!

When I'm not working, I love to watch web series, movies and listening to music.

Here are some insights from my LinkedIn profile.
